Transforming the **Complex Nature of Technology** into Simple Solutions

Communications represent the lifeline of your organization. Managing this lifeline, as well as all the other "unknowns" is vital in reducing threats to your network. **At Perical Solutions**, we deliver simple, yet powerful enterprise class IP environments that seamlessly join video, voice and data onto one platform, giving you a convenient way to immediately access all of your communications needs. We also deliver a full-suite of professional services specifically designed to mitigate risks within the complex nature of your IP infrastructure. Some of those services include:

Disaster Recovery. Maintain uptime for mission-critical applications through Perical's tested and reliable disaster recovery plans. Our intelligent storage, backup and recovery applications, including Business Continuity Solutions, Switching Systems, Data Replication and Storage Failover Solutions, can avoid interruptions or data loss during any type of disaster, natural or otherwise.

Crisis Management. Uncover the hidden nuances behind system failures within your complex IP environment utilizing the methods and solutions required to understand your technology at the granular level. Our Analytical Applications, Ubiquitous Diagnostics, and Proven Strategies minimize crisis situations, and quickly eliminate any underlying problems that may arise.

Network Support. Deliver the right mix of discipline, expertise and state-of-the-art technology by employing our superior-class network management solutions. Our Networking Mapping, Advanced Monitoring, Real-Time Alarms, and System Reporting keep your network fully operational and optimized for next generation solutions.

Want a trusted partner that can meet your strategic and exacting requirements? Then contact us today. Discover how we can help you meet the growing demands of your core business needs.
